

■ Smart Interview AI Analysis Report

Q1. What are the different log levels in Android?

Answer:

The different log levels in Android are Verbose, Debug, Info, Warning, Error.

Feedback:

The candidate correctly listed the different log levels in Android. The response was clear and concise showing good knowledge of the topic. However, the answer could have been improved by providing a brief explanation of each log level.

Score: 8 / 10

Suggestion:

Provide a brief explanation of each log level to showcase deeper understanding.
